

## Docker images vs docker containers

Tuesday, January 23, 2024 4:12 PM

### \* Docker Image.

- An executable application artifact.
- Includes app source code, but also complete environment configuration.

Application → JS app  
Any services needed → node, npm  
OS layer → Linux.

\* Imutable. template that defines how a container will be realized

### \* Docker Container.

→ Running instance of an image

~~44~~  
We can run multiple containers from  
1 image.
